Jérémy-Morgan PATOLE

Data Analyst | Data & AI

Paris, France | +33 7 69 28 00 57 | jerempatole@live.fr | LinkedIn | Portfolio

PROFILE

Data Analyst certified in AI development, with a background in aerospace and automotive engineering. I build reliable Python data pipelines, dashboards and real-time alerting systems. 3+ years in demanding industrial environments: standards compliance, configuration management, rigorous documentation.

SKILLS

Languages and data: Python (Pandas, pytest), SQL (MySQL), CSV, REST APIs, web scraping
Data engineering: Ingestion pipelines, data validation and cleaning, anomaly detection, deterministic replay, automation
Analytics and data science: EDA, hypothesis testing, A/B testing, statistics, machine learning models, sensitivity analysis
Data visualization: Tableau, Power BI, dashboards, data storytelling
AI: Building and orchestrating AI agents (Claude Code, Codex), prompt engineering, AI-assisted development
Tools: DataMiner, Qligent, Git / GitHub, VS Code, Notion, Trello, CATIA V5, VPM, PLM

PROFESSIONAL EXPERIENCE

Data Developer and Project Co-lead
Sep 2026 - Present

VekTrel, client project TMRC FX, Paris, France (hybrid)

EUR/USD market analysis assistant delivered to a client: real-time MetaTrader 5 data, pattern detection, alerts, desktop app for macOS and Windows.

- Python pipeline: continuous ingestion of M1 candles, strict CSV validation, multi-timeframe aggregation (M5, H1), UTC timestamps
- Data quality: outlier filtering (spreads, pip value), history reconstruction, deterministic replay with no look-ahead bias
- Sensitivity analysis of the detection rules on 6 months of real M1 history to settle parameters with the client
- Shipped modules: position-size calculator and risk register, alert engine with JSONL logging and CLI, macOS packaging
- About 740 automated tests, 33 releases shipped, 260+ commits in a team of 3 working with AI agents (PR reviews, GitHub issues)

Design Engineer, Rafale electrical installation
Oct 2022 - Mar 2025

ALTEN SA (engineering consultancy), on assignment at Dassault Aviation, Saint-Cloud, France

- CAD integration (CATIA V5) of wiring harnesses and equipment on the Rafale fighter jet (Navy, single-seat and two-seat variants), following Dassault Aviation standards and military specifications
- Aircraft documentation and configuration management in PLM software, rigorous change tracking

Engineering Intern
Feb 2022 - Aug 2022

Stellantis, Technical Center, Vélizy-Villacoublay, France

- Analysis of mechanical and statistical calculations to optimize steering system sizing and model robustness

DATA PROJECTS

- **Video game market analysis (capstone project)**: Data collection via APIs and web scraping, SQL modeling, Tableau dashboard, data storytelling. GitHub
- **Vanguard A/B test**: Comparison of two customer journeys, statistical testing and recommendation, Tableau visualization. GitHub
- **Film market analysis**: Data from APIs and web scraping, trend analysis with Python. GitHub

EDUCATION AND CERTIFICATIONS

Data & AI Bootcamp, French state-registered certification (RNCP37827, Block 1, EQF level 6)
Oct 2025 - Dec 2025

Ironhack Paris. Full data lifecycle: collection, cleaning, EDA, hypothesis testing, visualization, automation, machine learning.

Project Management Certification
Apr 2024

ORSYS, La Défense (Paris)

Master's degree (MSc) in Mechanics of Composite Structures, Aeronautics
2018 - 2020

Paris Nanterre University (UFR SITEC). Optimization and reliability, finite element method, structural dynamics.

Bachelor's degree (BSc) in Engineering Sciences, Mechanics
2016 - 2017

Paris Nanterre University

LANGUAGES AND INTERESTS

Languages: French (native) | English (fluent, professional working proficiency) | Spanish (basic)
Interests: DJ (house, afro house, hip-hop, amapiano) | Piano and percussion (20 years) | Martial arts (16 years)
